

(a) TP: key size = 1024

Code:

```
key = RSA.generate(1024)
```

Semgrep flags:

insufficient-rsa-key-size

TRUE POSITIVE

Rule correctly detects weak key

(b) FP: key size = 2048

Code:

```
key = RSA.generate(2048)
```

Semgrep flags:

insufficient-rsa-key-size

FALSE POSITIVE

Same rule, safe code — pattern matches API call, ignores parameter

Same rule, 50% precision — per-rule calibration needed to distinguish these cases
